CONTENTS

1. This is a *Title slide*
 - Outlined slide

THIS IS A *TITLE SLIDE*

- This is a simple slide with no title.
- **Bold and coloured** text by using `#stress(text)`.
- Sample link: typst.app.
 - Link styling using `link-style: "color", "underline", "both"`
- Font selection using `font: "Fira Sans"`.

This text has been written using `#framed(text)`. The background color of the box is customisable.

Frame with title

This text has been written using `#framed(title:"Frame with title")[text]`.

This is an auto-resized *focus*
slide.

- This is a #blank-slide.
- Available **themes**¹:

bluey, reddy, greeny, yelly, purply, dusky, darky.

- Or just use **your own theme color**:
 - theme: `rgb("30500B")`

¹Use them as **color** functions! e.g., `#reddy("your text")`

- Outline slides with outlined: true.

This is a #grayed text. Useful for equations.

$$P_t = \alpha - \frac{1}{\sqrt{x} + f(y)}$$

Columns can be
included using
`#cols[...] [...]`

And this
is

an example.

- Custom spacing: `#cols(columns: (2fr, 1fr, 2fr), gutter: 2em)[...]`
 - Add a **bibliography slide**...
 1. `#let bib = bibliography("you_bibliography_file.bib")`
 2. `#bibliography-slide(bib)`
